Description
I've added a patch to improve documentation for Racc module.

Not sure what to do with debug functions racc_*()

Or what to do with ext/racc?

Feedback welcome

History
#1 - 06/05/2012 07:14 AM - drbrain (Eric Hodel)
- Priority changed from Normal to 3

Since this documentation was sourced from https://github.com/tenderlove/racc/tree/master/doc/en I think it's best to import the tenderlove/racc doc/ directory into ruby as doc/racc, then we can use :include: to pull the grammar reference and whatnot into the right place.

The method documentation, though should be integrated directly. I think it's best to work on this against tenderlove/racc first then import it here as I think Aaron is doing primary development on github.

Aaron, do you have any opinion?

I would also like to hear Aaron's feedback regarding the debug functions racc_*()

I plan on rewriting this patch, with Eric's comments and submitting as a pull request to tenderlove/racc on github. Eric encouraged me to submit a pull request for racc instead of submitting patches to ruby-trunk. I will update this ticket when I've sent the pull request, thank you for your patience.
