**Description**

With --no-retry option, parallel test-all result looks strange as below.
I actually see a test error with ubuntu linux bundled openssl. I show this by another reproducible example.

For example:
Add a raise to emulate error.

diff --git a/test/openssl/test_ssl.rb b/test/openssl/test_ssl.rb

  $ make test-all TESTS="-j3 --no-retry openssl/test_ssl.rb"

2) E
28 tests, 284 assertions, 0 failures, 2 errors, 0 skips

I attached a patch which contains fixes as below.
  ● delete status line
  ● remove reports like 2) E
  ● correct failures/errors/skips counts

Above example doesn’t complete unless #6882 is solved. So attached patch contains fixes for #6882.
