Ruby master - Bug #6997

Improve documentation for OptionParser

09/09/2012 04:23 AM - eike.rb (Eike Dierks)

| Target version: | 2.0.0 |

Description

The documentation for OptionParser should be improved.

The current examples and and documentation do not yet describe how to access non option args

I suggest to change the simple example in the doc as follows:

opts.banner = "Usage: example.rb [options] file ..."

p "files:" + ARGV

It should be stated explicitely in the description, that parse! modifies the ARGV and removes all parseable args.

At least that is how I believe that the OptionParser.parse! works?

not yet tried it myself

History

#1 - 09/11/2012 05:02 AM - elke.rb (Eike Dierks)
Ok, I was a bit blind on that,
I think that I now do understand how it works.

But anyway, the documentation should be improved.

I'd suggest to improve the examples to make it more clear upfront.

#2 - 09/11/2012 05:53 AM - zzak (Zachary Scott)
Better and more examples are always welcome, if you have any ideas please feel free to submit a patch.

Otherwise, I'll try to put something together for this and #6996 sometime this week.

#3 - 09/15/2012 04:02 AM - zzak (Zachary Scott)
- Category set to doc
- Assignee set to zzak (Zachary Scott)
- Target version set to 2.0.0

#4 - 12/21/2012 10:27 PM - usa (Usaku NAKAMURA)
- Status changed from Open to Assigned

#5 - 12/22/2012 07:51 PM - stomar (Marcus Stollsteimer)
- File rdoc_lib_optparse.patch added

I tried to make this clearer, see patch.
I also changed the example to avoid a warning for "shadowed outer local variable".

zzak (Zachary Scott): Do you think that the "Further documentation" section is of any use in the current form (since changeset r36960)? I would suggest to remove it completely, since filing a ticket for usage questions seems not the right thing to do.

#6 - 12/23/2012 01:36 AM - zzak (Zachary Scott)
- Status changed from Assigned to Closed
- % Done changed from 0 to 100

This issue was solved with changeset r38561.
Eike, thank you for reporting this issue.
Your contribution to Ruby is greatly appreciated.
May Ruby be with you.

#7 - 12/23/2012 01:38 AM - zzak (Zachary Scott)
Thanks Marcus, I was holding off on this until I got around to some other patches I have in mind for OptionParser, but you beat me to it :)

Re: remove further documentation: I think we should keep it, it doesn't hurt to mention the tracker if anyone comes across any bugs it will probably be documentation related when reading the optparse docs.
