#### Description

I just installed ruby 2.0.0-preview1 using ruby-build [1](#) on Fedora 17 x86-64. However, it appears ./configure did not detect Fedora's readline 6.2 (/usr/lib64/libreadline.so.6 and /usr/include/readline/):

```
$ ruby-build -k 2.0.0-preview1 /usr/local/ruby-2.0.0-preview1
$ chruby_use /usr/local/ruby-2.0.0-preview1
$ irb
>> require 'irb/completion'
LoadError: cannot load such file -- readline
from /usr/local/ruby-2.0.0-preview1/lib/ruby/2.0.0/rubygems/custom_require.rb:36:in `require'
```

Nevermind, close this! Built ruby 2.0.0-preview1 manually and that fixed the problem.

- Status changed from Open to Rejected

Thank you, feel free to report any other things you notice!
