Status:	Closed	
Priority:	Normal	
Assignee:	nobu (Nobuyoshi Nakada)	
Target version:	2.0.0	
ruby -v:	ruby 2.0.0dev (2012-11-16 trunk 37667)	Backport:
Description		
After r37664 (rake 0.9.3), cannot make install when --enable-doc.		
installing default gems: C:/ruby-trunk/lib/ruby/gems/2.0.0 (cche, doc, gems, specifications)		
bigdecimal 1.1.0		
io-console 0.3		
json 1.7.1		
minitest 3.4.0		
psych 1.3.4

from ../ruby/tool/rbinstall.rb:667:in each'		
from ../ruby/tool/rbinstall.rb:667:in'		
The reason is that rbinstall.rb expects there is a line like VERSION='X.X.X.X'. (see tool/rbinstall.rb:603)		
But now lib/rake/version.rb is changed, so rbinstall cannot find its version.		
I think this is not rake's problem but rbinstall's.
