

Ruby trunk - Bug #7380

benchmark/driver.rb: --executables separator

11/17/2012 08:15 PM - Eregon (Benoit Daloze)

Status:	Closed	
Priority:	Normal	
Assignee:	ko1 (Koichi Sasada)	
Target version:	2.0.0	
ruby -v:	ruby 2.0.0dev (2012-11-17 trunk 37693) [x86_64-darwin10.8.0]	Backport:
Description		
Hello,		
The separator used between ruby executables for the benchmark/driver.rb script is ";".		
This requires the argument to be quoted (at least in bash/zsh) and produce an unintuitive result if not: only the first executable is taken by the script, the second executable launches the ruby interpreter with no arguments, thus waiting on stdin, which feels like the benchmark script hangs.		
I proposed to use ":", the standard path separator instead.		
For compatibility, ";" could split too, but I wish to document ":" in the help.		
What do you think? May I go ahead?

ko1, what do you think?

I always use -e with quote strings. does it bother you?

By the way, -e accept `:`
like -e "foo::path1; bar::path2"
as a label of path.

Benoit, thank you for reporting this issue.

Your contribution to Ruby is greatly appreciated.

May Ruby be with you.

By the way, -e accept `:`
like -e "foo::path1; bar::path2"
as a label of path.

Oh, right, I did not think to the name::path usage, it would be weird to have both : and ::.

I like the solution to pass multiple -e options, thank you!
