Description
I found the following test failure on Windows 8.

test_system_redirect_win(TestSystem) [c:/work/snapshot-mg64/test/ruby/test_system.rb:123]:
[ruby-talk:258939].
expected but was

I think the test_system_redirect_win is a wrong test case.
the ping command is not the point of [ruby-talk:258939].
And the ping result may differ depending on the machine.

Ah, I should check these Win8 tickets, but I have no time before the release limit of preview 2.

Committers, please check the tickets and fix them (if you can) before the release...

I can't understand this test.
Kosaki-san, can you describe?

expected but was
.
This failure is also occurred on Windows 8.

I'm not sure why you think the third case should be true.
Here is patch:
