Ruby master - Bug #7571

RDoc documentation bug in Regexp#===
12/16/2012 10:55 AM - sawa (Tsuyoshi Sawada)

Status: Closed
Priority: Normal
Assignee: zzak (Zachary Scott)
Target version: 2.0.0
ruby -v: 1.9.3

Backport:

Description
RDoc documentation for `Regexp#===' says:

Case Equality—Synonym for Regexp#=~ used in case statements.

but it is not a synonym for Regexp#=~' as Regexp#===' returns true' or false' and Regexp#=~' return an integer or nil'.
This issue was solved with changeset r38567.
Tsuyoshi, thank you for reporting this issue.
Your contribution to Ruby is greatly appreciated.
May Ruby be with you.

- re.c (rb_reg_eqq): doc: #=== is not a synonym for #=~., added example [ruby-dev:46746] [Bug #7571]
