

Ruby master - Bug #7581

DTrace test should be executed against RUNRUBY

12/17/2012 08:24 PM - vo.x (Vit Ondruch)

Status: Closed	
Priority: Normal	
Assignee: tenderlovmaking (Aaron Patterson)	
Target version:	
ruby -v: ruby 2.0.0dev (2012-12-17 trunk 38422) [x86_64-linux]	Backport:

Description

Currently, the DTrace tests are executed using system Ruby [1], which is apparently wrong, since system Ruby might be of different version or may not be available. The tests should be executed against RUNRUBY, which were just build.

This issue was solved with changeset r38424.
Vit, thank you for reporting this issue.
Your contribution to Ruby is greatly appreciated.
May Ruby be with you.

Use EnvUtil.rubybin instead of Gem.ruby

Thank you for the fix.

Just wondering, if will it work with dynamically linked ruby as well? I am testing the functionality on Linux with dynamic linking and SystemTap and there I have to specify path to the library. Not sure if DTrace works the same, since I have no Mac nor Solaris available.

Sorry, I don't know.
