These are good, for small changes I don't mind grouping them into one patch, though I'll probably commit them separately.
I noticed a few small spelling errors, like usage vs useage, but nothing I can't handle myself.

Sorry for dragging my feet on these, but you're doing a good job Vincent. Thank you!

Hello Vincent,

I've committed your patch for lib/debug. As r39019, I was reviewing your patch for lib/pp.rb and noticed the example for PPMethods::check_inspect_key doesn't work in trunk.

::check_inspect_key(obj.object_id) returns nil
then ::push_inspect_key(obj.object_id) raises: NoMethodError: undefined method `[]=' for nil:NilClass

#5 - 02/05/2013 11:03 AM - vbatts (Vincent Batts)

interesting, doing a little bootleg debugging

I see, the example added to the methods is misleading. I'll revamp the docs for PP, and create a new issue.

Alrighty, since I don't have rights to close issues, I'll just add the updated PP/PrettyPrint patch here. This patch fixes the confusing `_inspect_key` example and also sets nodoc on the pretty print modifications to basic objects. This patch also completes the documentation for PrettyPrint.

This issue was solved with changeset r39180.
Vincent, thank you for reporting this issue.
Your contribution to Ruby is greatly appreciated.
May Ruby be with you.
