Ruby master - Bug #7680

IRB autocompletion doesn't autocomplete methods

01/10/2013 10:05 PM - zzak (Zachary Scott)

**Description**

steps to reproduce:

```
$ irb
.irb(main):001:0> irb_
```

This returns nothing, but should return all of the irb commands. Such as `irb_binding`, `irb_context`, `irb_jobs`, `irb_help`, etc etc

$ irb
   irb(main):001:0> irb_

This returns nothing, but should return all of the irb commands. Such as irb_binding, irb_context, irb_jobs, irb_help, etc etc

Please, try:

% irb -r irb/completion
   irb(main):001:0> irb_

This works, should irb/completion be required by default?

zzak (Zachary Scott) wrote:

This works, should irb/completion be required by default?

Yes.
Otherwise, you can write .irbrc to:

require "irb/completion"

Can we make irb default require irb/completion?

I will open up a feature request.

I looks like it never was. Although I don't see any reason for not including this behaviour by default. Maybe depending on readline.

zzak (Zachary Scott) wrote:

I will open up a feature request.

Irb completion function is still incomplete.
I might be the default this feature is now more complete.
