<b>ruby -v:</b>	ruby 1.9.3p362 (2012-12-25 revision 38607) [x86_64-darwin12.2.1]	<b>Backport:</b> 2.3: UNKNOWN, 2.4: UNKNOWN, 2.5: UNKNOWN

#### Description

I can consistently cause a segfault in p362 that does not occur in p327 in my Rails project. From the stack trace it seems to be related to threads and yield. Unfortunately the code is for my company, Square, so it's a trade secret, but I can answer questions and run tests for you. In the attachments I have included verbose set\_trace\_func output, but the presence or absence of set\_trace\_func does not alter the crash.

Mac OS X 10.8.2, Xcode command line tools, RVM

This is probably the same bug fixed in p363 (unreleased)

See <https://bugs.ruby-lang.org/issues/7629>

Hopefully a new 1.9.3 release will come soon (meanwhile you can use SVN or the git mirror).
