

## Ruby master - Bug #7808

### [PATCH] Allow to install arch specific code into different location then nonarch

02/09/2013 08:41 AM - vo.x (Vit Ondruch)

<b>Status:</b> Closed	
<b>Priority:</b> Normal	
<b>Assignee:</b> nobu (Nobuyoshi Nakada)	
<b>Target version:</b> 2.6	
<b>ruby -v:</b> ruby 2.0.0dev (2013-02-08 trunk 39161) [x86_64-linux]	<b>Backport:</b>
<b>Description</b> Due to recent changes in configuration, it is pretty easy to allow install architecture specific code into different location (/usr/lib64) then nonarch code (/usr/share) and thus provide better compliancy with FHS [1]. Could you please consider accepting this patch? We are carrying similar patch in Fedora already for ages.  [1] <a href="http://www.pathname.com/fhs/pub/fhs-2.3.html">http://www.pathname.com/fhs/pub/fhs-2.3.html</a>

### History

#### #1 - 02/09/2013 09:19 AM - Hanmac (Hans Mackowiak)

does this patch break that ticket did? [#6111](#)

for debianoid system that support more than two architectures, /usr/lib32 and /usr/lib64 are not enough so i wanted that ruby can be installed "/usr/lib/ruby/" like "/usr/lib/x86\_64-linux-gnu/ruby/2.0.0"

i dont know if this breaks FHS

#### #2 - 02/09/2013 03:11 PM - nobu (Nobuyoshi Nakada)

- Status changed from Open to Feedback

```
=begin
Isn't ((%--with-rubyarchprefix%)) enough?
```

```
Do you want ((|rubyarchdir|)) not to include ((|ruby_version|))?
=end
```

#### #3 - 02/09/2013 07:17 PM - vo.x (Vit Ondruch)

--with-rubyarchprefix always prepends --with-rubylibprefix ... therefore you can hardly use it to separate arch libraries into /usr/lib while place noarh into /usr/share

And no, we don't need ruby version, since Fedora provides just single version of Ruby.

#### #4 - 02/09/2013 07:29 PM - vo.x (Vit Ondruch)

Hanmac (Hans Mackowiak) wrote:

does this patch break that ticket did? [#6111](#)

No it does not. It just extends what was done for [#6111](#)

#### #5 - 02/17/2013 02:17 PM - ko1 (Koichi Sasada)

- Category set to build

- Assignee set to nobu (Nobuyoshi Nakada)

- Target version set to 2.6

critical for 2.0.0?

If it is critical, then please change target version.

**#6 - 03/23/2013 08:46 AM - vo.x (Vit Ondruch)**

- Status changed from *Feedback* to *Closed*

I was able to find suitable configuration options for -p0. I no longer need this patch. Thank you.
