

Ruby trunk - Bug #7809

Backport RubyGems fixes in r39166 to ruby 2.0.0

02/09/2013 09:28 AM - drbrain (Eric Hodel)

Status: Closed	
Priority: Normal	
Assignee: drbrain (Eric Hodel)	
Target version: 2.0.0	
ruby -v: -	Backport: 2.3: UNKNOWN, 2.4: UNKNOWN, 2.5: UNKNOWN
Description r39166 contains two RubyGems fixes. The change to lib/rubygems/package.rb is a critical bug fix for RubyGems signing support. Without this fix users of the LowSecurity policy will not be able to install signed gems. The change to lib/rubygems/package/old.rb is not a critical bug fix. It will make my diagnosis of problems in RubyGems easier, though. It does not change operation of RubyGems in Ruby 2.0.0.

It looks a borderline case. Is there no workaround?

#2 - 02/10/2013 03:54 AM - drbrain (Eric Hodel)

- File *package.rb.signature_fix.patch* added

The change to lib/rubygems/package/old.rb is not critical. It suppresses a warning almost nobody will ever see and fixes behavior on 1.8.7. These are not sufficient for inclusion.

The change to lib/rubygems/package.rb is critical. Without it users will not be able to install signed gems built with rubygems 2.0 or newer on ruby 2.0.0 without upgrading rubygems.

The attached patch fixes only the critical issue.

#3 - 02/10/2013 09:03 AM - mame (Yusuke Endoh)

- Assignee changed from mame (Yusuke Endoh) to drbrain (Eric Hodel)

Okay, please commit your second patch. Thank you!
