Try ri Kernel#open instead

#2 - 04/05/2013 11:03 PM - zzak (Zachary Scott)

- Status changed from Open to Feedback

#3 - 04/06/2013 12:44 AM - dunric (David Unric)

I know about invoking documentation for instance methods. It's about open is listed & linked in Kernel's class methods. It either has to be removed or the missing ri for Kernel::open added.

#4 - 04/19/2013 08:23 AM - zzak (Zachary Scott)

- Category changed from doc to lib

- Status changed from Feedback to Assigned

This actually seems like a bug in RDoc, so I'm assigning it to Eric.

You can easily reproduce this by the following:

```
((ri open)) from trunk  
=end
```

#5 - 04/28/2013 10:50 AM - zzak (Zachary Scott)

- *Status changed from Assigned to Closed*

I've moved this over to RDoc's bug tracker: <https://github.com/rdoc/rdoc/issues/222>
