Currently Open Struct doesn't format its YAML output exposing `((|@table|))`. It also doesn't create setters and getters like `((#marshal_load))`. This patch does both.

Interesting feature request. This reasoning would also apply to all stdlib classes, like Set, Matrix, ... right?

I'm not sure it's a big issue, but a patch like this would make yaml serialization both backwards and forwards incompatible. It would be easy to make it at least backwards compatible.

This has (finally) been fixed, thanks for opening the issue.
