

Ruby trunk - Bug #8521

bootstrap tests failure caused by \$SAFE=4

06/13/2013 01:19 AM - luislavena (Luis Lavena)

Status:	Closed	
Priority:	Normal	
Assignee:	shugo (Shugo Maeda)	
Target version:	2.1.0	
ruby -v:	trunk r41261	Backport: 1.9.3: UNKNOWN, 2.0.0: UNKNOWN
Description		
Hello,		
It seems that the change of \$SAFE=4 to raise ArgumentError is causing bootstrap tests to fail:		
http://c5664.ruby-ci.org/~chkbuid/ruby-trunk/log/20130612T153301Z.log.html.gz#btest		
And also on Windows CI:		
http://ci.rubyinstaller.org/job/ruby-trunk-x64-build/1641/console		
http://ci.rubyinstaller.org/job/ruby-trunk-x86-build/1756/console

I've fixed it in [r41269](#). Thanks.
