I quote from [ruby-core:21234] :
```

But first of all the HTTP --> HTTPS redirection should be still considered ok.

Regarding the other way, well, the Referer should be set to the URL that redirected us. I believe this is not currently implemented. As for cookies, AFAIK there's no direct support for cookies in Net::HTTP nor open-uri, so if the programmer wants to use cookies, she has to set it manually via a "Cookie" header. And since no support for cookies as per RFC2109 is in place, no security measures are implemented. So for example one URL can redirect to other (also HTTP) URL, which is in another domain, and the cookie (actually header) will be sent anyway. So the fact that the "secure" attribute of cookie is unsupported diminishes in light of this. Therefore I think that redirecting from HTTPS to HTTP should be considered ok too.

```

Then your previous patch is wrong.

#7 - 05/18/2011 02:41 PM - xaviershay (Xavier Shay)

Why was this closed? This bug is still present in trunk. A patch was reverted in [r21381](#), but it was not the patch that Nobuyoshi has proposed, and there was no indication as to why it was reverted (my guess is because it allowed https -> http redirection).

#8 - 05/18/2011 02:51 PM - naruse (Yui NARUSE)

- Status changed from Closed to Assigned

- Priority changed from 3 to Normal

#9 - 06/26/2011 04:37 PM - nahi (Hiroshi Nakamura)

- Target version set to 1.9.3

Tanaka-san, please handle this.

#10 - 07/28/2011 11:21 PM - nahi (Hiroshi Nakamura)

Akr, I think we agreed that http -> https redirection is OK. If you don't like ad-hoc change for 1.9.3, I can do that ugly thing instead of you. :) Do you mind if I'd do that?

#11 - 08/01/2011 10:18 PM - akr (Akira Tanaka)

- Target version changed from 1.9.3 to 2.0.0

I'd like generic solution. Especially because open-uri doesn't provide a way to specify headers for each request for redirection.

#12 - 12/04/2012 01:28 AM - jaimeiniesta (Jaime Iniesta)

I've packed this patch as a gem:

https://github.com/jaimeiniesta/open_uri_redirections

#13 - 12/09/2012 09:17 PM - mame (Yusuke Endoh)

- Tracker changed from Bug to Feature

#14 - 12/09/2012 09:17 PM - mame (Yusuke Endoh)

- Target version changed from 2.0.0 to 2.6

#15 - 10/31/2014 10:00 AM - naruse (Yui NARUSE)

FYI, HTML5 defines whether it should redirect or not:

<http://www.w3.org/TR/2014/REC-html5-20141028/infrastructure.html#processing-model>

#16 - 08/28/2016 11:51 AM - cabo (Carsten Bormann)

A typical example of the consequences of this 7-year old bug is <https://github.com/cabo/kramdown-rfc2629/issues/27>

Please wake up and fix this. Now.

#17 - 09/07/2016 07:14 AM - akr (Akira Tanaka)

- Status changed from Assigned to Closed

Applied in changeset [r56085](#).

lib/open-uri.rb: Allow http to https redirection.

- lib/open-uri.rb: Allow http to https redirection. Note that https to http is still forbidden. [ruby-core:20485] [Feature [#859](#)] by Roman Shterenzon.
