- ext/readline/readline.c (readline_s_set_input): on OS X with editline,
  Readline.readline doesn't work because readline_get doesn't use

rl_getc. The difference is introduced by r42402 [ruby-dev:47509]
[Bug #8644]. Before it rb_io_stdio_file set ifp->stdio_file.
Therefore add manually setting the value.

- ext/readline/readline.c (readline_s_set_onput): ditto.

This issue was solved with changeset r42402.
Akira, thank you for reporting this issue.
Your contribution to Ruby is greatly appreciated.
May Ruby be with you.

- ext/readline/readline.c (Init_readline, readline_s_set_output) (clear_rl_outstream, readline_s_set_input, clear_rl_instream) (readline_readline): fix causing SEGV if closed IO object that is set Readline.input or Readline.output. Patched by akr [ruby-dev:47509] [Bug #8644]
