

Ruby trunk - Bug #9027

[Doc] improve rdoc of Digest module

10/16/2013 08:35 PM - stomar (Marcus Stollsteimer)

Status:	Closed	
Priority:	Normal	
Assignee:	zzak (Zachary Scott)	
Target version:	2.1.0	
ruby -v:	ruby 2.0.0p247 (2013-06-27 revision 41674) [i686-linux]	Backport: 1.9.3: UNKNOWN, 2.0.0: UNKNOWN

Description

Some improvements in mainly the module documentation:

- provide more examples
- provide a working example for the "bubble babble" encoding
- fix dead link
- fix some typos

(Right now the "bubble babble" thing is completely unclear or rather essentially undocumented; also the linked to Wikipedia article has been deleted. I also added examples for MD5--which is otherwise undocumented--, for different encodings, and for creating a digest for a file.)

How do you handle backports? Will I have to open separate tickets as soon as this is merged to trunk?

#4 - 11/10/2013 08:38 AM - zzak (Zachary Scott)

I will handle the backports after reviewing and committing this patch, it's larger so I need a little more time to review.

Thank you!
