

Ruby trunk - Bug #9092

Update Unicode data to Unicode Version 7.0

11/07/2013 02:39 PM - duerst (Martin Dürst)

Status:	Closed	
Priority:	Normal	
Assignee:	naruse (Yui NARUSE)	
Target version:	2.2.0	
ruby -v:	trunk	
Description		Backport:
<p>As done regularly, Ruby should be updated to the newest version of Unicode, 6.3. This year's updates on the Unicode side are mostly in the area of bidi (bidirectional text), which doesn't affect Ruby, but there are also a few new characters and a few property changes. (This assumes that Ruby is already at version 6.2.) For details, please see http://www.unicode.org/versions/Unicode6.3.0/.</p>

History

#1 - 01/30/2014 06:17 AM - hsbt (Hiroshi SHIBATA)

- Target version changed from 2.1.0 to 2.2.0

#2 - 02/03/2014 06:12 AM - duerst (Martin Dürst)

- Subject changed from Update Unicode data to Unicode Version 6.3 to Update Unicode data to Unicode Version 7.0

Unicode 6.3 came out in 2013. In 2014, Unicode 7.0 will be available, quite surely in time for a December release of 2.2. Most data files are already available as alpha versions for early tests at <http://www.unicode.org/Public/7.0.0/ucd/>.

#3 - 02/14/2014 10:19 AM - matz (Yukihiko Matsumoto)

Agreed. We'd better use the latest Unicode data.

Matz.

#4 - 06/18/2014 11:07 AM - duerst (Martin Dürst)

Unicode 7.0 has been released officially. Please see <http://unicode-inc.blogspot.com/2014/06/announcing-unicode-standard-version-70.html>.

#5 - 07/16/2014 03:27 AM - naruse (Yui NARUSE)

- Status changed from Open to Closed

- % Done changed from 0 to 100

Applied in changeset r46831.

- regcomp.c: Merge Onigmo 5.14.1 25a8a69fc05ae3b56a09. this includes Support for Unicode 7.0 [Bug #9092].

This is just an additional comment for future reference:

The Unicode Consortium has announced (<http://unicode-inc.blogspot.ch/2014/08/new-publication-schedule-for-unicode.html>) that it will publish new major versions of Unicode in June every year. In particular, Unicode Version 8 will be published in June 2015.
