This might help, also:
http://whynotwiki.com/Ruby/_/Numbers#Comparing_Floating-Point_Numbers

=end

#3 - 12/23/2008 01:57 PM - kstephens (Kurt Stephens)

=begin
Perhaps Ruby should do what Common Lisp implementations have been doing:

<http://portal.acm.org/citation.cfm?id=989431>
<http://kurtstephens.com/files/p372-steele.pdf>
<ftp://netlib.bell-labs.com/netlib/fp/gdtoa.tgz>

Perhaps the default Float#to_s formatting should not throw away necessary precision, so that:

```
some_float == eval("#{some_float}")
```

is always true.

=end

#4 - 12/23/2008 11:52 PM - matz (Yukihiro Matsumoto)

- *Status changed from Open to Rejected*

=begin
OP is not a bug at all. We will consider about Float#to_s later.
Thank you for the info, Kurt.
