

Ruby master - Feature #9322

method_defined? family of of methods should support the exclusion of ancestors

12/30/2013 08:12 PM - rits (First Last)

Status:	Open	
Priority:	Normal	
Assignee:		
Target version:		
Description		
getting an array of all instance methods (instance_methods(false)) and scanning through it for a match seems like a poor substitute
