Ruby master - Bug #9369
Using XMLScanStreamParser in xmlrpc/parser may result in parse errors
01/06/2014 07:30 PM - herwinw (Herwin Quarantainenet)

Description
I've tried to use the attached script to test if the XMLScanStreamParser would be a suitable alternative for REXMLParser (which often results in out-of-memory-errors when using large data chunks). Unfortunately, using this parser results in other errors:

/usr/lib/ruby/1.9.1/xmlrpc/parser.rb:747:in `on_stag_end': wrong number of arguments (3 for 1) (ArgumentError)

The code calling on_stag_end in xmlscan/parser.rb is quite simple:

```ruby
def on_stag_end(name, *a)
  @visitor.on_stag_end name, *a
end
```

The following should probably fix this (although I've got no idea if this has any side effects):

- def on_stag_end(name); end
- def on_stag_end(name, *a); end

An alternative solution might be to remove the definition of on_stag_end completely, that will result in a call to method_missing, which doesn't do anything either.
