Description
I was wondering if we could do this type of change on the logger class:

https://github.com/arthurnn/ruby/commit/376b9f944948662ac816ad179ae90bc50a2a6c8f

I am proposing this, because if we have access to the mutex, on the logger instance, we would be able to synchronize methods such as:

https://github.com/rails/rails/blob/95f5f8167ff86550d7fa9f5f7419cc9b38ef9704/activesupport/lib/active_support/logger_silence.rb#L12

And make it thread-safe.
