

Ruby trunk - Bug #9930

unicode filenames somehow don't work

06/11/2014 05:11 AM - rogerdpack (Roger Pack)

Status: Open	
Priority: Normal	
Assignee: cruby-windows	
Target version:	
ruby -v: ruby 1.9.3p194 (2012-04-20) [i386-mingw32]	Backport: 2.0.0: UNKNOWN, 2.1: UNKNOWN
Description Something seems amiss here--I can't seem to pass in a unicode filename and have it used for reading/opening a file: C:\>type read.rb p ARGV p Dir['*'] p File.binread(ARGV[0]).size c:\>ruby read.rb "(° 3 °).mp4" ["(?\xB0 ?? ?\xB0).mp4"] ["(?\xB0 ?? ?\xB0).mp4"] read.rb:3:in `binread': Invalid argument - (?° (Errno::EINVAL) from read.rb:3:in ` <main>' (jrubby too, fwiw...)</main>	

History

#1 - 06/11/2014 06:40 AM - nobu (Nobuyoshi Nakada)

- Description updated
- Category set to platform/windows
- Assignee set to cruby-windows
- Target version set to 2.2.0

ARGV is still in the default external encoding, i.e., console codepage.

We'd like to make them UTF-8, but have no concrete migration plan yet.

#2 - 01/05/2018 09:00 PM - naruse (Yui NARUSE)

- Target version deleted (2.2.0)
